

Are Proud to Present
Fall Baseball 2019

Using spring training experiences with the Cincinnati Reds and Arizona Diamondbacks organizations, in combinations with knowledge as an associate scout, Justin Santonocito has spent several years specifically engineering The Academy Stars Fall Baseball Program to help young players elevate their play to the next level. With Major League Baseball's Spring Training Camp as the blueprint for The Academy Star's Fall Baseball Program, he was able to focus on developing players as quickly and efficiently as possible while maintaining a large emphasis on the finer details that often separate good players, from great players. Players participate in position specific training days as well as games (regionally) 3 times per week.
